

DAKSH MAURYA

PROFILE

Passionate and driven Software Developer with 3 years of hands-on experience gained during a diploma program. Skilled in C, C++, Java, Python, and VB.NET, with a strong focus on code optimization, Java GUI development, and machine learning with Python. Developed multiple projects, including a food ordering app in VB.NET. Continuously learning and staying updated with the latest machine learning and game development technologies to create innovative, user-friendly software solutions.

PROFESSIONAL EXPERIENCE

- **Programming Languages:** Proficient in C, C++, Java, Python, and VB.NET, with a focus on optimized code and problem-solving.
- **Machine Learning:** Experience with Python for building and deploying machine learning models and projects.
- **UI/UX & Game Development:** Expertise in Unity for game development and UI/UX design, creating interactive experiences.
- **3D Modeling & Visualization:** Skilled in Blender for product visualization and 3D modeling.
- **Visual Design:** Proficient in Adobe Photoshop for creating high-quality visuals.
- **Unreal Engine 5:** Hands-on experience in Blueprint Scripting and 3D modeling for immersive, interactive projects.
- **Mobile App Development:** Built 50+ mobile apps covering a wide range of unique features and topics.

EXPERTISE

- Programming Languages
- Software Development
- 3D Modeling & Visualization
- Mobile App Development
- Design & Creative Tools
- Passionate Learner

EDUCATION

Thakur Polytechnic, Kandivali

Diploma in Computer Engineering

SKILLS

- **Programming Languages:** C, C++, Java, Python, VB.NET
- **Machine Learning:** Python (Model Building and Project Development)
- **Game Development & UI/UX Design:** Unity (Interactive Design & Game Mechanics)
- **3D Modeling & Visualization:** Blender (Product Visualization and 3D Asset Creation)
- **Visual Design:** Adobe Photoshop (High-Quality UI/UX and Graphic Design)
- **Game Engines:** Unreal Engine 5 (Blueprint Scripting and 3D Modeling)
- **Mobile App Development:** Experience building 50+ mobile apps with unique features
- **Software Optimization:** Writing efficient, optimized code for performance improvement
- **Windows GUI Applications:** VB.NET (Developed applications like a food ordering app)
- **Project Development:** Full-stack development of diverse applications across platforms
